REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: No prior art, and in particular, the art of record, Edelstein (US 2005/0194619), teaches a dielectric comprised of a carbon doped oxide with the claimed modulus, hardness and dielectric constant with an open pore structure. Edelstein teaches a dielectric with disconnected voids of a characteristic diameter of a few nanometers (paragraph [0051]), which is not within the scope of applicants "open pore structure", namely a pore structure characterized by interconnecting pore channels as opposed to single passage closed channels (Specification, page 5, lines 1 and 2).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
